Summary ........................................................................................................................................... 5

Describing, Conceiving and Correlating Compliance Tools, in Order to Use Them Adequately ................................................................................................................................. 9

MARIE-ANNE FRISON-ROCHE

Chapter 1

LEGAL AND ECONOMIC APPROACHES TO COMPLIANCE TOOLS ... 33

Legal Approach to Compliance Tools: Building by Law the Unity of Compliance Tools from the Definition of Compliance Law by its “Monumental Goals” .......................................................... 35

MARIE-ANNE FRISON-ROCHE

I. The teleological nature of Compliance Law, attaching all the tools to the monumental goals they serve .............................................. 36
   A. Compliance Law, an extension of Regulatory Law .................... 37
      1) Compliance Law, a Regulatory Law beyond the regulated sectors ......................................................................................... 37
      2) Compliance Law, bearer of pretensions beyond those of Regulatory Law: the “monumental goals” of compliance ...... 39
   B. Unicity of compliance tools through the normativity of monumental goals in relation to those with which they combine ........................................................................................................... 41

II. Interpretation method and strength of constraint of compliance tools ................................................................................................. 42
   A. The interpretation methods required for all the compliance tools ......................................................................................................... 42
B. The legal constraint detached from the source criterion to be attached to the link between the tool and the goal........44

1) The handling of the distinction between obligation of means and obligation of results superimposed on the distinction between compliance “tools” and the “monumental goals” pursued........................................44

2) The required probative culture, based on a systematic program of preconstitution of proof...................................45

An Economic Approach to Compliance Tools: Finality, Measure, and Effectivity of Constrained or Chosen Compliance

LAURENT BENZONI and BRUNO DEFFAINS

I. Constrained and chosen compliance: an economic taxonomy entailing a legal framework....................................48

A. An economic taxonomy.................................................................48

B. Legal correspondence.................................................................49

II. Compliance: tools, effectivity, and measures..............................51

A. Constrained compliance and the economics of law: averting risk drives the decision to conform..........................52

B. Chosen compliance: seeking competitive advantages and/or productivity gains..........................................55

Conclusion........................................................................................................57

Chapter 2

RISK MAPPING, CENTRAL COMPLIANCE TOOL........................................59

Drawing up Risk Maps as an Obligation and the Paradox of “Conformity Risks”...............................................61

MARIE-ANNE FRISON-ROCHE

Abstract........................................................................................................61

I. So little noise for so much.................................................................62

II. Risk mapping, a process often described but rarely legally defined by legislation........................................63
III. The absence of a legal definition of risk mapping reflects uncertainties regarding the qualification of the compliance mechanisms themselves

IV. “Conformity risks”, identified elements of risk mapping, a logical reference to the substantial definition of Compliance Law

V. The hypothesis of risk mapping, a legal obligation of results, ancillary to the main obligation of the means to achieve a “monumental goal”

VI. The hypothesis of risk mapping as a legal fact

VII. The hypothesis of a general and autonomous legal obligation of establishing risk mapping for legal subjects in a position to know them

VIII. Third parties subjective right to be disturbed by the knowledge of risk mapping, in order to be able to exercise their freedom of action

Compliance Risk Mapping: First Insight into the Challenges, Limits, and Best Practices

Nicolas Guillaume

I. Risk-based regulations: a growing trend!

II. Risk mapping: a means or an end?

III. From error to fault...

IV. Risk mapping or risk mappings?

V. Basic principles common to the different risk maps

VI. A diversity of risk maps reflecting specificities according to the nature of the risk

VII. The art and the manner

VIII. From mapping to risk management

IX. Mapping, an essential tool for strengthening the risk culture
Chapter 3
PLACE AND USE OF INCENTIVES IN COMPLIANCE SYSTEMS .....81

Incentive Theory and Governance of Space Activities .............83

LUCIEN RAPP

Summary ..............................................................................................................83
I. Introduction .....................................................................................................84
II. Context ..........................................................................................................85
III. Issues ...........................................................................................................87
IV. Behavioural approach ................................................................................88
V. Architecture of choice and incentives .......................................................92
VI. Techniques and biases ..............................................................................94
VII. International agreements and customary law .........................................97
VIII. Conclusion ...............................................................................................99

Resolving the Contradiction between “Sanction” and
“Incentive” under the Fire of Compliance Law .........................101

MARIE-ANNE FRISON-ROCHE

I. The tendency to only think of sanctions as “incentives” in
Compliance Law ...............................................................................................103
A. Criminal Law, a “formidable” tool for encouraging companies to “comply” ........................................................................103
B. The clash between the rationale of compliance and
the fundamental principles of classical Criminal Law .........................105

II. The link between the sanction as incentive and the principles
of the Rule of Law ............................................................................................106
A. The general terms of the articulation between the
sanction as an incentive for companies to reach the
“monumental goals” and the principles of the Rule of Law ......106
B. The need to maintain the prevalence of the principles
of the Rule of Law, so that the Law still exists .........................108
C. The preferred solution: a repressive Law remaining
autonomous, interpreted teleologically with regard to the
monumental goals of compliance ...............................................................109
## Contents

### The Manifestations of Incentive Mechanisms in French Compliance

**Marion Larouer**

I. Fighting corruption: the decision of the *Agence française anti-corruption* of 4 July 2019 ........................................ 115

III. Liability, transparency, and compliance: first assessment of duty of vigilance of parent companies and ordering companies under Law No. 2017-399 of 27 March 2017 and *Déclaration de performance extra-financière* (DPEF) ........................................ 119

### Data Sovereignty and Compliance

**Hubert Tardieu**

I. Introduction ............................................................................................... 123

II. The incentives for business data sharing.................................................... 125

III. The challenges of data sovereignty .......................................................... 128

IV. The precedent of compliance in finance and its application to business data sharing .................................................. 129

V. Conclusion .................................................................................................. 130

### Incentive(s) and Self-Regulation(s): What Place for Compliance Law in the Audiovisual Sector?

**Laurence Calandri**

About the contribution to compliance law of the litigation of audiovisual regulator’s soft law acts ........................................ 131

I. The recognition of compliance law in the audiovisual sector thanks to a lessened justiciability of incentive acts .................. 133

A. A first step: a hallow recognition ................................................................. 133

B. A second step: an express recognition ....................................................... 135

II. The deployment of compliance law in the audiovisual sector through a principle of unjusticiability of supervision acts ........ 136

A. The affirmation of a principle of unjusticiability of the “calls to the law” ................................................................. 136
B. A recognition favorable to the rebuilding of media regulation

Compliance and Incentives: a Promising Tandem

MARIE-ANNE FRISON-ROCHE

I. Incentive compliance, integrating time in the crucial operators to recognize them as second-level regulators: digital and finance

II. Incentive compliance, integrating industrial projects within operators coordinated in the European zone

III. Public Supervision substituted for Regulation in the hypothesis of incentive compliance

Chapter 4

THE REQUIRED EXPERTISES IN TERMS OF COMPLIANCE

Audit Of Compliance Systems

ANTOINETTE GUTIERREZ-CRESPIN

I. Audit as a steering tool for compliance programs

II. An essential element of the control and internal evaluation of the compliance program

III. The scope of application of compliance audits

IV. A tool for detecting potential breaches

V. Approach

VI. Audit preparation

VII. Compliance audit actors

VIII. Performance of the compliance audit

IX. Reporting, remediation, and follow-up of the compliance audit

X. Conclusion

The Development Of Attorneys’ Compliance Expertise

SIDNE KOENIGSBERG and FRANÇOIS BARRIÈRE

I. An expertise reinforced through specialization and collaboration

II. An expertise consolidated by a continuous cycle between ex-ante and ex-post aspects
Compliance or the Passage from Ex Post to Ex Ante: a Copernican Revolution for the Criminal Lawyer? .......................... 165

THOMAS AMICO

I. Compliance: preventing the risks ......................................................... 166
   A. Ex-ante approach: a method for compliance ............................... 166
   B. The role of the criminal lawyer in the implementation
      of compliance programmes ......................................................... 168

II. Compliance: controlling the risks ...................................................... 169
   A. Anticipating regulators’ controls .................................................. 169
   B. Anticipating criminal proceedings ............................................... 171

Chapter 5
THE GEOGRAPHICAL DOMINANCE OF COMPLIANCE TOOLS ...... 173

Geographical Dominance in the Choice and the Use
of Compliance Tools ........................................................................... 175

Introductory remarks
JEAN-BAPTISTE RACINE

Conception and Application of Compliance in Africa ..................... 183

M. MAHMOUD MOHAMED SALAH

I. The burst of compliance in African laws ......................................... 186
   A. The vectors of the burst of compliance in African laws ............... 187
   B. The legal translations of compliance in Africa ............................ 190

II. The efficiency of compliance in Africa ........................................... 193
   A. The importance of the informal sector reduces the field
      of deployment of compliance ...................................................... 193
   B. The weakness of state structures ................................................. 195

Conclusion .............................................................................................. 197

Anti-Corruption Compliance: Global Dimension
of Enforcement and Risk Management .............................................. 199

ROGER BURLINGAME, KAREN COPPENS, NOEL POWER and DAE HO LEE

I. Introduction .......................................................................................... 199
II. Importance of anti-corruption compliance programmes underlined in the US, UK and France ...........................................200

III. Requirements established in the US, UK, and France for an anti-corruption compliance programme ..........202
   A. A Tailor-Made Programme ..........................................................202
   B. Top-Level Commitment ................................................................204
   C. Effective Communication and Training, and a Tailored Code of Conduct ..................................................204
   D. Third Party Due Diligence and Management .........................205
   E. Internal Investigation Process and Whistle-Blower Protections .........................................................................206

IV. Conclusion: Different jurisdictions but unifying compliance against corruption .........................................................208

Chapter 6
THE MEASURE OF COMPLIANCE TOOLS EFFECTIVITY ..........209

The Regulator’s Inspection Of The Effectiveness
Of The Compliance Tools Implemented By The Company ......211

Maxime Galland

I. Ex ante: the regulator specifies the purpose of the rule and supports the deployment of the tool ......................................................213
   A. Developing an effective tool requires an understanding of the purpose of the rule ..................................................213
   B. The regulator shall ensure that the standard is comprehensible........................................................................215

II. Ex-post: the regulator stigmatises compliance tools’ lack of tangible effect .................................................................217
   A. Accountability as a lever for controlling effectiveness .................218
   B. Thinking of compliance in terms of exemplarity exemplified...219
The Maturity of the Compliance Tool’s User, First Criterion of the Choice of the Salient Tool

Aurélie Banck

I. The salient tool for a firm is not the one used by another ................. 226
II. The “salient tool” for the structure that will use it is not the one the compliance officer prefers! ......................................................... 227

Chapter 7

TRAINING, ALPHA AND OMEGA OF COMPLIANCE .................................. 229

Compliance Training: Through and Beyond Traditional Legal Training

Hervé Causse

I. The International Reality .................................................................... 233
II. Cultural Confrontation ........................................................................ 234
III. The Practice ..................................................................................... 235
IV. The Need for Organization ................................................................. 237
V. The Practice of Law ........................................................................... 238
VI. The Requirement of Experience .......................................................... 238
VII. The Revival of Classical Law ............................................................... 239
VIII. Past and Present Exercises ................................................................. 241
IX. A Psychological Part ......................................................................... 241

Training: Content and Container of Compliance .................................. 245

Marie-Anne Frison-Roche

Abstract ........................................................................................................ 245

Introduction .................................................................................................. 246

I. The content: the principles of compliance training ................................ 249
A. The purpose of compliance training .................................................. 250
1) Through training, helping the company to reach the “monumental goals”, principles of Compliance Law ........ 250
2) Through training, reinforcing the interconnection on which Compliance Law is based .................................... 251
3) Through training, to establish a probative culture through which the company can find its place in Compliance Law ................................................................. 252

B. The determining elements for compliance training programs 254
1) The people who recommend compliance training .................. 254
2) The people trained in compliance ........................................... 255
3) The teachers ........................................................................... 257
4) The subjects taught in compliance........................................... 258
5) The methods for teaching Compliance .................................... 259
6) Measurement of compliance training programs ....................... 260

II. The container: the other compliance tools, elements of training 261
A. The pedagogical dimension of risk mapping, an element of compliance training ......................................................... 261
B. The pedagogical dimension of in-house control procedures, an element of compliance training ............................................. 262
C. The teaching dimension of normative production, an element of compliance training ......................................................... 263

Training and Compliance, Two Correlated Information Transmission Tools ................................................................. 265

THEO THIOURET

Introduction .................................................................................. 265

I. Information circulation, at the heart of compliance law 267
A. Information circulation within the “crucial operator” ............... 267
B. Circulation of information between “crucial operators” .......... 268

II. Training, an efficient tool to circulate information ................. 269
A. The identity element: training makes information accessible by nature .................................................................................. 269
B. The difference element: training ensures that information is “well received” by its recipient ......................................................... 270

III. Spontaneous or imposed implementation of trainings into compliance programs: the Total and Johnson & Johnson cases 271
A. The spontaneous implementation of training: the Total case .. 272
B. The forced implementation of training: the Johnson & Johnson case ..............................................................273

Conclusion .....................................................................................................................................................274

Chapter 8
TECHNOLOGICAL TOOLS AND COMPLIANCE BY DESIGN .................275

Compliance by Design in Antitrust: Between Innovation and Illusion ..................................................................................................................277
JEAN-CHRISTOPHE RODA
I. Paths .....................................................................................................................................................279
II. Pitfalls ....................................................................................................................................................282

The Normative Originality of Compliance by Design ..........................287
CÉCILE GRANIER
I. Compliance by design and application of the norm ..........................................................290
   A. An automatized application of the norm ............................................................................291
   B. An increased efficiency of compliance by design? ..........................................................293
II. Compliance by design and design of the norm .............................................................295
   A. The integration of the norm to the design ..........................................................295
   B. The design control ..............................................................................................................297

Technological Tools, Compliance by Design and the GDPR: Data Protection by Design ..................................................299
LUDOVIC PAILLER
I. The technological means of data protection by design ..................................................302
II. Compliance of data protection by design ........................................................................303

Morality by Design .................................................................................................................................307
SAMIR MERABET
I. Compliance, a method to elaborate a moral rule .........................................................310
   A. The author of the moral rule ..........................................................................................310
   B. The content of the moral rule ......................................................................................312
II. Compliance by design, a technique for the application of the moral rule.................................................................315
   A. The interest of Morality by design...............................................315
   B. The practice of Morality by design...........................................317

Subjective Rights, Primary and Natural Tools of Compliance Law ..................................................................................319

MARIE-ANNE FRISON-ROCHE

Summary.................................................................................................319

I. Subjective Rights, the most effective tools for an efficient compliance......................................................................322
   A. The proliferation of individual rights in economic systems regulated by Compliance and Regulation Law .................323
      1) The unilateral power of the State, formerly sufficient to govern economic fields .............................................323
      2) The admittance de jure of classical subjective rights, a consequence of the integration of co-ordination and compliancy as a part of the rule of law.................................325
      3) The hatching of subjective rights renewed or which are specific to Compliance Law: from the right to access to the right of forgetfulness .................................................................327
   B. The explanation of the hatching of subjective rights by the will to effectively achieve monumental goals: subjective rights as a pure tool ....................................................330
      1) Subjective rights, a technique for private enforcement........331
      2) The specific quarrel regarding the subjective rights of the information provider: the activation of whistleblowers .................................................................................................332
      3) The specific favour that has to be taken regarding collective mechanisms serving individual subjective rights: Class Action ................................................................................333

II. Subjective Rights, the most natural Compliance Law tools characterized as the concern for people..........................336
A. The legitimacy of subjective rights: tools, mirrors of Compliance Law characterized as the concern for people....336
   1) The definition of Compliance Law based on its “monumental goal” to protect human beings..................337
   2) The Legitimacy of all subjective rights: tools for the fulfilment of people’s protection and the correlative technical interpretation..........................................................337

B. The multiplication of subjective- tool - rights and final subjective rights.................................................340
   1) The extensive interpretation of subjective rights – media, mirror of the served goal................................340
   2) The invention of final subjective rights.............................................342

Contents ........................................................................................................................................343
