

“What happens when the world’s leading academic expert on regulation is plunked into the real world of government? Sunstein is that expert, and he was the regulatory boss of the US government from 2009 to 2012. *Valuing Life* describes both how Sunstein’s ideas about regulation influenced his tenure in government, and how his experiences in government have influenced his ideas about regulation. This immensely rewarding book, written in the humane, beautiful style that Sunstein is known for, should be read by everyone who cares about how our government works.”

ERIC POSNER, University of Chicago

“Written with clarity and elegance, this book explains how White House oversight of the federal regulatory state is conducted—both the procedures and the analytics. It is a must read for academics and practitioners interested in improving the quality of federal regulation.”

JOHN D. GRAHAM, Indiana University and former Administrator of the
Office of Information and Regulatory Affairs

“An immensely insightful look at one of the least understood and most influential agencies in the government and the complex factors that it considers in helping to determine what is and isn’t subject to government regulation.”

CAROL BROWNER, distinguished senior fellow, Center for American Progress
